-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of Species D (Figures 13-15) in the reply filed on 3/16/2007 is acknowledged. The traversal is on the ground(s) that the species restriction should be between the insertion device of Figures 1-8 and the insertion device of figures 9-18. This is not found persuasive because the Applicant did not provide any specific arguments supporting the traversal and the Applicant has cancelled claims 15-24.

The requirement is still deemed proper and is therefore made FINAL.

Claim 9 is withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. The insertion device of Figures 13-15 is hollow and cannot be characterized as solid and non-ductile.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8, 10-14 and 25-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear if the "cannula" is part of the device or if the device is used to insert the "cannula".

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 10-14, and 25-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Funderburk et al. (6,093,172). Funderburk discloses a device (10) for inserting a cannula comprising a cannula (26), a protective element (28) which can accommodate the cannula, an operating element (38) which can move the cannula out of the protective element, and a holder (20) comprising a connecting element (perimeter of 20), further comprising a needle (12) surrounded by the cannula, wherein the needle can be inserted completely into the protective element, and a spring (36) and the operating element generates a force on the needle in an inserting direction, wherein the device is connectable to a base (24), wherein the device comprises a connecting element (46), wherein the protective element is a frame or sheath, and further comprising a sealing element in the holder, wherein the device is reusable and can be rotatably connected to the foundation body.
